

## Trailer Lubrication System

# A Grease Jockey Automatic System holds the solution of highway

## Single Point System, Make it Easy to Lubricate, Multiple Points From Just a Single Grease Fitting....

Critical lubrication of S-cams and slack adjusters is easy to overlook on highway trailer fleets. Equip your trailer fleet with compact, dependable Grease Jockey Lubrication Systems and provide your PM personnel with a fast, easy-to-reach point for manual lubrication -you'll know that all points were greased!

### System Features

The Lubrication system is built around a Graco MSP divider valve that directs lubricant from your hand grease gun or powered pump to each lube point.

It's a "series progressive" system - That means each point receives lubricant in turn. No points are overlooked, blocked lines can't be skipped without alerting your mechanic, and dirt or moisture can't back up into the system.

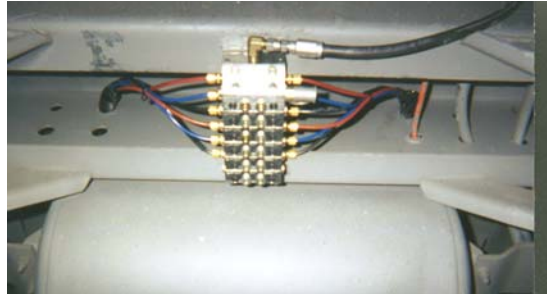

Kits include heavy wall nylon distribution lines, lube-point fittings and mounting hardware.

- Divider valve sections dispense precise amount of lubricant.
- Reduced lube consumption, no ground contamination.
- Maximum system pressure of 3,500 psi to accommodate standard grease lubricants.
- Optional accessories for special requirements.

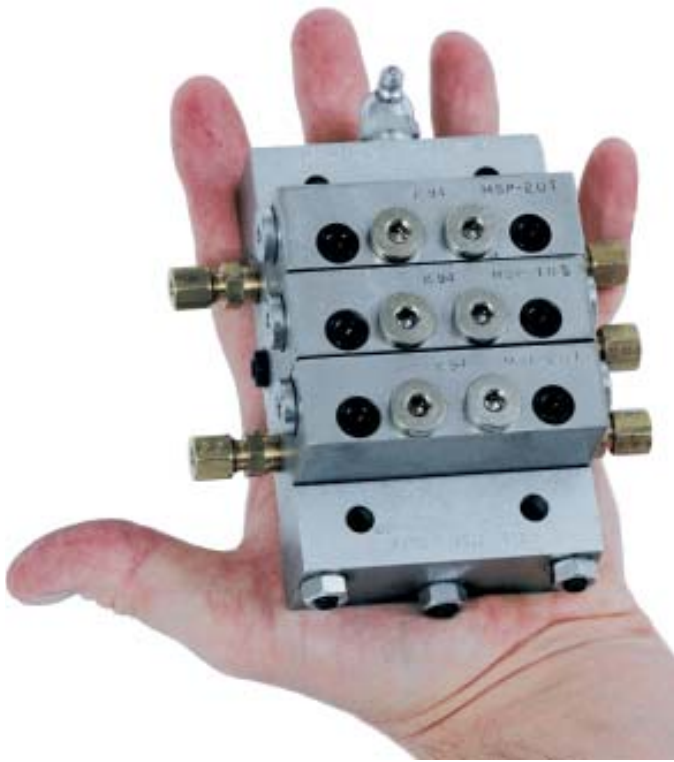

### Kits to Meet Your Specific Needs

- Single point manual systems for single axle, tandem axle, and landing gear.
- Automatic system for single and tandem axles, land gear and lifts.
- Conversion kits from manual to automatic operation.
- Option to add landing gear to axle kits.
- Kits can be designed for your specific application.

### Custom Kits Available

# or Single-Point Lubrication to fast, Effective lubrication trailer fleets.

## Fast Installation

- Compact diverter valve assembly easily bolts to frame in clearly visible, conveniently reached position.
- Standard tube fittings, factory-assembled to simplify installation.
- Lube-point fittings for all standard threads.
- Pre-charged tube bundles to simplify routing and start-up.

## Improved Vehicle Performance

- Better vehicle handling--smoothly operating brake adjusters for even brake application.
- Improved vehicle operation--helps straight, sure stops, even in "panic" applications.

## Fast Payback/Long Life

Labor savings alone quickly pay back the cost of equipment and installation. Lubricant costs are reduced and longer component life is assured by frequent applications of small amounts of lubricant by reliable equipment.

Rugged "Made-in-U.S.A. equipment will last the life of the trailer and is essentially maintenance-free.

# Options and Ordering Information

## Conversion to Automatic Operation: Easy & Inexpensive

Grease Jockey single point trailer lubrication system can be made fully automatic by simply adding an air-powered pump/reservoir assembly.

## Ordering Information

Single Point Manual Systems	Part Number
6 point single axle kit .....	550-502-051
12 point tandem-axle kit .....	550-502-061
5 point landing gear kit .....	550-502-121

### Port Assembly Fittings and Adapters

1/4-28 male elbow adapter to 1/8 NPT female .....	550-400-800
1/4-28 male straight adapter to 1/8 NPT female .....	550-400-880
3/16 tube to 1/8 NPT male Straight fitting .....	435-460-030
3/16 tube to 1/8 NPT male elbow fitting .....	435-440-030
zerk adaptor elbow to 3/16 tube .....	550-402-860
zerk adaptor straight to 3/16 tube .....	550-402-870
Manual Purge Gun with 0-5000 psi pressure gauge .....	142-000-751

### Automatic Systems

6 point single axle kit .....	550-503-290
12 point tandem axle kit .....	550-503-420

## Kits Available

The modular design and variety of output volumes of the divider valves makes it quick and easy to configure a system to meet your specific application. Ask for an evaluation and recommended system.

## For Lubrication of Your Tractor

Graco offers Grease Jockey, the most widely recognized automatic lubrication system for medium and heavy duty tractors.
